PCcaps™

To Speed up
Pre-Clinical
Trials

PCcapsTM
For Pre-Clinical Studies

PCcapsTM to Speed

Features & Benefits

- **Excipients no longer needed**
to homogenize the active ingredient
- **Solvents unnecessary**
which may not be compatible with
the normal physiology of the animal
- Facilitates delivery of the **right dose**
- **Prevents regurgitation**
and upper GIT irritation
- **Masks taste and odour**
which facilitates administration
- This uniquely shaped two-piece hard gelatin
capsule is compatible with contents **from
non-aqueous liquid to granules**
- PCcapsTM are suitable for **coating**

Performing pharmacokinetic or safety studies with rodents is a critical part of the pre-clinical tests which must be performed before first entry to human clinical trials.

It is also said that conducting of safety studies is often rate-limiting to the clinical program. For rodents, forced administration should be employed for oral administration which implies delivering the exact dose in an appropriate vehicle.

In our continuing effort to bring meaningful solutions to pharmaceutical scientists, we are offering a new line of two-piece hard gelatin capsules, PCcaps™ for pre-clinical studies.

up Pre-Clinical Trials

- PCcaps™- kit including:
- a delivery device,
a stand and a funnel
 - 2 boxes of 50 PCcaps™ each

- PCcaps™- box including:
- 1 box of 50 PCcaps™
